

ControlPoint for SharePoint Administration

SHOW YOUR SHAREPOINT ENVIRONMENT WHO'S BOSS

Think of ControlPoint for SharePoint Administration as the brains behind your SharePoint operation. Manage your entire environment from a single interface. Control permissions and security. Automate governance. Analyze usage and activity. Mastermind site, content, and storage strategies. Now that's using your head.

KEY BENEFITS

Governance is a given

Enforce SharePoint governance automatically, on premise or in the cloud. No more tedious, time-consuming, and manual processes.

Save hours and headaches

An hour spent managing user access? 30 minutes responding to audit requests? An afternoon to find and remove outdated content? Not any more. ControlPoint for SharePoint Administration cuts admin time — and hassles — in half.

Improve your view

Get the visibility you need to manage permissions, copy sites, and analyze activity, content, and storage. Enable better collaboration with dashboards that show you what you need, the way you want to see it.

Work smarter

Use the insight gained from ControlPoint for SharePoint Administration to work smarter. Sharpen the focus of your SharePoint team and make better-informed management decisions.

Stay safe and secure

Manage security at farm, site, and user levels. Send poorly managed permissions packing. Say goodbye to security breaches and their associated costs.

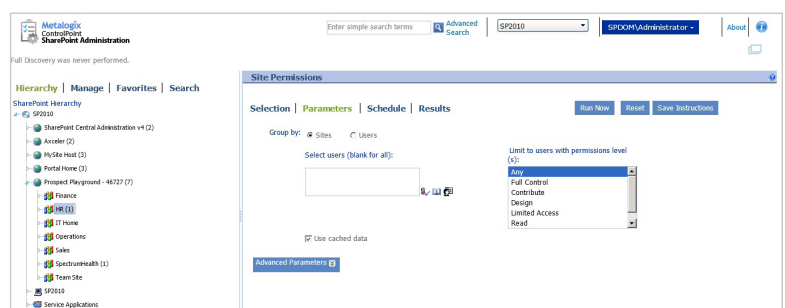

Get your ROI

Bust through the administrative obstacles that block SharePoint's value. Boost end user adoption and knock down demands on your infrastructure. Revel in the return on your investment.

WHY CONTROLPOINT FOR SHAREPOINT ADMINISTRATION?

“As a SharePoint administrator, ControlPoint for SharePoint Administration has been nothing short of a miracle. It allows me the flexibility to manage multiple farms from a single user web interface.”

— Eric Wells
SharePoint Administrator
NYU Medical Center

ROLE-BASED DELEGATION

ControlPoint for SharePoint Administration is a powerful tool for all SharePoint administrators — scope and functionality are trimmed to meet the needs of farm, site collection, site admins, or even business power users.

SYSTEM REQUIREMENTS

ControlPoint for SharePoint Administration runs within your SharePoint environment on systems that meet the following requirements:

- ▶ Windows Server 2003 or 2008, MOSS is optional and enables richer activity reports than WSS alone
- ▶ SQL Server 2005 or 2008, SharePoint 2010 (Server or Foundation), or SharePoint 2007, SharePoint 2013
- ▶ Supports IE 7, 8 & 9, and, for SharePoint 2010, Firefox 3 and Safari 5.2 or higher

ABOUT METALOGIX

Metalogix provides content infrastructure software to improve the use and performance of enterprise content. For over a decade, Metalogix has transformed the way commercial and government organizations manage terabytes of content to improve knowledge sharing and collaboration.

Today, more than 14,000 customers rely on the company's products to upgrade, migrate, organize, store, archive and replicate content on Microsoft SharePoint, Exchange and Cloud platforms. Metalogix is a privately held company backed by Insight Venture Partners and Bessemer Venture Partners.

Governance

- ▶ Enforce global policies
- ▶ Prevent user actions that do not comply with policies — such as enforcing site level quotas, limiting which templates are allowed, and preventing site and document deletion
- ▶ Get alerts to critical changes in your environment, including permissions

Security

- ▶ Perform comprehensive user analysis to determine when and where permissions were generated
- ▶ Analyze security at any scope within your farm
- ▶ Manage user permissions (set, delete, reassign, duplicate, inheritance, backup, and restore)
- ▶ Get recommendations for permissions cleanup
- ▶ Manage site permissions (duplicate, backup, restore)
- ▶ Manage SharePoint groups
- ▶ Support claims-based authentication

Analysis and reporting

- ▶ Use dashboard reporting capabilities to let anyone from business owners to CXOs evaluate KPIs
- ▶ Conduct interactive analysis for flexible, comprehensive visibility, including custom reporting, and tabbed and graphical reports
- ▶ Use powerful drill down or drill across capabilities for targeted analysis and immediate action
- ▶ Compare historic patterns and trends to better plan out your future requirements
- ▶ Get in-depth analysis and control of SharePoint audit and change logs
- ▶ Identify and correct broken links

Usage and activity

- ▶ Analyze activity down to the site, page, or document level
- ▶ Identify who accesses which documents
- ▶ Isolate sites that are no longer needed and delete them
- ▶ Identify duplicate files
- ▶ Report on workflow definitions and instances
- ▶ Find sites with the most or least activity

Content and storage

- ▶ Monitor and track the number and size of sites for better planning
- ▶ Analyze web part usage
- ▶ Manage SharePoint features and alerts
- ▶ Deploy workflows to sites or lists
- ▶ Analyze content types and managed metadata usage
- ▶ Ensure consistent branding and behavior across sites and lists
- ▶ Move or copy site collections, sites, lists, libraries, folders, and items within or across farms
- ▶ Quickly go from test environment to production environment
